## **DETAILED ACTION**

### ***Specification***

1. The disclosure is objected to because of the following informalities: Priority data should be added in the first line of the specification.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kirkendall (4,812,054) in view of De Van et al. (3,696, 969) or Ingolstadt (DE 9110468).

Kirkendall discloses, in figs. 7-9, a liquid dispenser comprising a flexible cover 10 having insulating material and vapor barrier material; and a beverage container 36 (rigid support member).

Kirkendall does not disclose the rigid support member or the beverage container comprising a stand and a flexible material liquid container.

De Van et al. or Ingolstadt teaches a rigid beverage container comprising a stand and a flexible material liquid container.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made, in view of the teaching of De Van et al. or

Ingolstadt, to modify the Kirkendall beverage container with a stand for support the container in standing position, and a flexible material liquid container for dispensing liquid stored in a flexible bag.
